COMMENTS

- The presentation is consistent with the main requirements of the post course assignment.
- Specific targets were set for each sustainability pillar (workplace, marketplace, environment, and society) for the upcoming years. However, the goals that were presented could have been more specific and numerical, especially regarding society.
- A bigger analysis was needed on the specific areas for improvement analyzed on the assignment.
- A clear introduction was provided.
- The distinction between goals, objectives is detailed.
