

This is to acknowledge that

PARASCHOS CHRISTODOULOU

Attended a one-hour webinar and Q&A session entitled

Urinary NMR diagnostics for inborn errors of metabolism using rule-based interpretation (for research use only)

October 14th, 2020

Key Learning Outcomes

How to generate an NMR quantitative report on the basis of 150 metabolites

How to link this report to the metagene database

How clinical and general laboratory findings can be included and enhance the diagnostic power

How the method can be used to automatically get proposals for a patient's disease

The value of a patient's diagnosis repository for documentation and training
